

Landon Pullam

PORTFOLIO RESUME

SOFTWARE ENGINEER | FULL-STACK DEVELOPER

Bolivar, MO 65613 | (573) 318-8746 | landonpullam@gmail.com | landonpullam.com | linkedin.com/in/landon-pullam-147a602aa

PROFESSIONAL SUMMARY

Software engineering and cybersecurity student with professional product experience and independent full-stack delivery for four published small-business websites, with a fifth in development. Builds responsive interfaces, data-backed workflows, and secure application features from discovery through production.

TECHNICAL SKILLS

Programming: JavaScript, HTML, CSS, C#, SQL, Java, Python

Frameworks and UI: React, Razor, Mustache, responsive design, UI/UX, accessibility

Backend and data: Supabase, Postgres, Auth, Row Level Security, Storage, Edge Functions

Delivery: Git, Bitbucket, SourceTree, Netlify, Cloudflare, DNS, SSL, debugging, Agile/Scrum, code review

EXPERIENCE

Show Me Web Design | Independent Software Developer | Jul 2026 - Present

- Delivered four published client websites and developed a fifth awaiting client launch across industrial, automotive, home care, tattoo, and property service businesses.
- Engineered a connected marketing, client, and staff platform with JavaScript, Supabase Postgres, Auth, Row Level Security, private Storage, database functions, and Edge Functions.
- Owned discovery, content architecture, UI development, accessibility, technical SEO, deployment, and production support from initial scope through launch.

Datix | Software Development Intern | Oct 2024 - Mar 2026

- Led a visual and UX modernization of the Intelligrate platform, improving responsive behavior and interaction consistency across major modules.
- Rebuilt organization-health dashboards to group stability issues by severity and operational impact, supporting faster diagnosis of system problems.
- Developed simulation overlays for validating complex mappings without affecting production systems, and debugged modal rendering, validation logic, and nested map visualization.
- Contributed through Agile planning, pull requests, peer review, Git, and Bitbucket.

SELECTED PROJECTS

Ashen Hymns - Studio Management Platform | ashenhymns.com

- Built artist profiles, galleries, image-based tattoo requests, a role-based request inbox, appointment views, business settings, and privacy-conscious public availability.

Star Auto Group - Inventory and Operations | starautogroup417.com

- Built inventory browsing, vehicle galleries, filtering, and comparison for up to three vehicles; extended private workflows for sales, payments, reporting, imports, backups, merge checks, and rollback protection.

Lambert Property Services - Responsive Rebuild | *In development*

- Developed an 11-page responsive site with five service funnels, an interactive map for 31 communities, accessible interactions, clean routes, and structured search metadata; launch is awaiting client input.

EDUCATION

Southwest Baptist University | Bolivar, MO | Expected May 2027 | GPA: 3.906

B.S. Software Engineering; B.S. Cybersecurity | Minors: Mathematics; Web Systems & Design
